

## DRIER

### ROTARY DRYERS and SPECIAL DRIER

All dryers manufactured from Therm-Tech, are custom designed to suit the unique processing needs of your material. We can design a rotary drum dryer for every your application.

Rotary dryers are a efficient industrial drying for bulk solids.

Rotary dryers work by tumbling material in a rotating drum in the presence of a drying air. They can also be indirectly heated to avoid direct contact between the material and processing medium.

### FEATURES

Diameter: 0.6m up to 3.5m

Capacity: 0.5Tph up to 100Tph

Special internal "lifters" are designed to improve heat transfer between the material and hot gas flow.

Heavy duty design and construction to guarantee many years of service
